DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "high" in claims 1, 5, 9, 13, 19 and 26 is a relative term, which renders the claim indefinite. The term "high" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably appraised of the scope of the invention. If applicant intends any particular pressure, it must be clearly recited.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Lee et al. (6,391,768) and Chiang et al. (US Patent Application Publication 2003/0073286).

Lee et al. disclose providing a substrate (2) and depositing thereon a layer of silicon oxynitride (40); using a slurry to remove said layer of silicon oxynitride, thereby forming a fresh surface (Col. 6, lines 40-57); washing any remaining slurry; and subjecting said fresh surface to a high pressure rinse by a solution that comprises a surfactant that modifies hydrophobic behavior, thereby removing from said fresh surface any and all residual particles of silicon oxynitride (Col. 6, lines 50-57).

Lee et al. do not disclose mounting said substrate on a platen and, using a polishing pad.

Chiang et al. disclose a CMP process introducing a slurry from a stationary overlying tube dropwise onto a polishing pad of a rotating table (platen).

It would have been within the scope of one of ordinary skill in the art to combine the teachings of Lee et al. and Chiang et al. to achieve the silicon oxynitride removing step.

Choice of a particular pH, surfactant, surfactant concentration and rinse pressure would have been a matter of routine optimization. In addition, the selection of particular pH surfactant, surfactant concentration and rinse pressure, is obvious because it is a matter of determining optimum process conditions by routine experimentation with a limited number of species of result effective variables. These claims are prima facie obvious without showing that the claimed ranges achieve unexpected results relative to the prior art range. In re Woodruff, 16 USPQ2d 1935, 1937 (Fed. Cir. 1990). See also In re Huang, 40 USPQ2d 1685, 1688 (Fed. Cir. 1996)(claimed ranges of a result effective variable, which do not overlap the prior art ranges, are unpatentable unless

Art Unit: 2823

they produce a new and unexpected result which is different in kind and not merely in degree from the results of the prior art). See also *In re Boesch*, 205 USPQ 215 (CCPA) (discovery of optimum value of result effective variable in known process is ordinarily within skill or art) and *In re Aller*, 105 USPQ 233 (CCPA 1995) (selection of optimum ranges within prior art general conditions is obvious).

Allowable Subject Matter

Claims 5, 9, 13, 19 and 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 6-8, 10-12, 14-18, 20-25 and 27-32 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
